# CONTENTS

<b>Preface to the Second Edition</b>	<b>xi</b>
<b>Preface to the First Edition</b>	<b>xiii</b>
<b>1 Thermal Stresses in Bars</b>	<b>1</b>
1.1 Stress and Strain	1
1.1.1 Stress and Strain	1
1.1.2 Hooke's Law	3
1.1.3 Free Thermal Expansion and Free Thermal Strain	4
1.1.4 Action of External Force and Temperature Change	5
1.2 Thermal Stresses in Clamped Bars	5
1.2.1 Constant Temperature Change	5
1.2.2 Non-Uniform Temperature Change	13
1.3 Thermal Stresses in Partially Restrained Bars	15
1.4 Thermal Stresses in Bars Under Bending	22
Problems	24
<b>2 Thermal Stresses in Beams</b>	<b>29</b>
2.1 Thermal Stresses in Beams	29
2.1.1 Stresses in Beams Subjected to Mechanical Loads	29
2.1.2 Thermal Stresses in Clamped Beams	31
2.1.3 Thermal Stresses in Rectangular Beams	32
2.2 General Technique for Thermal Stresses in Beams	34
2.3 Thermal Stresses in Composite Beams	39
2.3.1 Thermal Stresses in a Two-Layered Beam	39
2.3.2 Thermal Stresses in Two Beams Clamped at Each End	46

2.3.3	Thermal Stresses in Multi-Layered Composite Beams	52
2.4	Thermal Stresses in Nonhomogeneous Beams	54
2.5	Thermal Stresses at Arbitrary Temperature	56
2.5.1	Homogeneous Beams	56
2.5.2	Nonhomogeneous Beams	59
2.6	Thermal Deflection in Beams	62
2.7	Curved Beams	65
2.8	Thermal Shearing Stresses in Thin-Walled Beams	68
2.9	Thermal Stresses in Beams on an Elastic Foundation	71
	Problems	76
<b>3</b>	<b>Heat Conduction</b>	<b>81</b>
3.1	Heat Conduction Equation	81
3.2	Boundary and Initial Conditions	89
3.2.1	Boundary Conditions	90
3.2.2	Initial Condition	93
3.3	One-Dimensional Heat Conduction Problems in Cartesian Coordinates	93
3.3.1	One-Dimensional Heat Conduction Equation	93
3.3.2	One-Dimensional Temperature in the Steady State	94
3.3.3	One-Dimensional Transient Temperature; Separation of Variables	96
3.3.4	One-Dimensional Transient Temperature; Laplace Transform	102
3.4	One-Dimensional Heat Conduction Problems in Cylindrical Coordinates	111
3.4.1	Heat Conduction Equation in Cylindrical Coordinates	111
3.4.2	One-Dimensional Temperature in the Steady State	112
3.4.3	One-Dimensional Transient Temperature in a Solid Cylinder	115
3.4.4	One-Dimensional Transient Temperature in a Hollow Cylinder	118
3.5	One-Dimensional Heat Conduction Problems in Spherical Coordinates	123
3.5.1	Heat Conduction Equation in Spherical Coordinates	123
3.5.2	One-Dimensional Temperature in the Steady State	124
3.5.3	One-Dimensional Transient Temperature in a Solid Sphere	127
3.5.4	One-Dimensional Transient Temperature in a Hollow Sphere	129
	Problems	134
<b>4</b>	<b>Basic Equations of Thermoelasticity</b>	<b>137</b>
4.1	Stress in a Cartesian Coordinate System	137
4.1.1	Equations of Equilibrium	137
4.1.2	Coordinate Transformation of Stress	142
4.2	Strain in a Cartesian Coordinate System	144
4.2.1	Components of Strain	144
4.2.2	Compatibility Conditions	145
4.2.3	Coordinate Transformation of Strain	146
4.3	Governing Equations of Thermoelasticity	147
4.3.1	Constitutive Equations	147
4.3.2	Displacement Equations	149
4.3.3	Compatibility Equations in Terms of Stress	150
4.3.4	Boundary Conditions	151
4.3.5	Body-Force Analogy	152
4.4	General Solution of Navier's Equations	153
4.4.1	Thermoelastic Displacement Potential	153

4.4.2	Displacement Potentials	156
4.4.3	General Solutions for the Potential Function	160
4.5	Cylindrical Coordinate System	162
4.5.1	Stress in a Cylindrical Coordinate System	162
4.5.2	Strain in a Cylindrical Coordinate System	163
4.5.3	Generalized Hooke's Law in a Cylindrical Coordinate System	165
4.5.4	Navier's Equations of Thermoelasticity in a Cylindrical Coordinate System	165
4.6	Spherical Coordinate System	168
4.6.1	Stress in a Spherical Coordinate System	168
4.6.2	Strain in a Spherical Coordinate System	169
4.6.3	Generalized Hooke's Law in a Spherical Coordinate System	171
4.6.4	Navier's Equations of Thermoelasticity in a Spherical Coordinate System	172
4.7	Multiply Connected Bodies	173
4.7.1	Basic Equations for Multiply Connected Bodies	173
4.7.2	Temperature Distributions with Zero Thermal Stress	176
	Problems	178
<b>5</b>	<b>Plane Thermoelastic Problems</b>	<b>179</b>
5.1	Plane Strain and Plane Stress	179
5.1.1	Introduction	179
5.1.2	Plane Strain	180
5.1.3	Plane Stress	183
5.1.4	Governing Equations of Plane Problems	187
5.2	Thermal Stress Function	189
5.2.1	Thermal Stress Function	189
5.2.2	Displacements by Thermal Stress Function	190
5.2.3	Boundary Conditions in Terms of Thermal Stress Function	192
5.2.4	Multiply Connected Bodies	193
5.2.5	Temperature Distribution with Zero Thermal Stress	196
5.2.6	General Solution of Thermal Stress Function	198
5.3	Complex Variable Method	203
5.3.1	Complex Presentation of Thermal Stress Function	203
5.3.2	Complex Representation of Stress and Displacement	205
5.3.3	General Formulae for Multiply Connected Bodies	208
5.3.4	Conformal Mapping of the Formulae of Plane Theory	211
5.4	Potential Method	214
	Problems	218
<b>6</b>	<b>Thermal Stresses in Circular Cylinders</b>	<b>221</b>
6.1	One-Dimensional Problems	221
6.1.1	Displacement Technique	222
6.1.2	Thermal Stress Function Technique	233
6.1.3	Thermoelastic Potential Technique	234
6.1.4	Complex Variable Technique	236
6.1.5	A Note on Reciprocal Theory Technique	240
6.1.6	Dislocation Technique	240

6.2	Plane Problems	244
6.2.1	Steady State Thermal Stresses in a Hollow Cylinder	244
6.2.2	Transient Thermal Stresses in a Solid Cylinder	250
6.3	Two-Dimensional Problems (Axisymmetric Problems)	259
6.3.1	Fundamental Equations for Two-Dimensional Problems	259
6.3.2	Steady State Thermal Stresses in a Semi-Infinite Body	261
6.3.3	Steady State Thermal Stresses in a Long Circular Cylinder	266
6.3.4	Transient Thermal Stresses in a Thick Plate	269
6.4	Three-Dimensional Problems	273
6.4.1	Solution Methods in Three-Dimensional Problems	273
6.4.2	Steady State Thermal Stresses in a Semi-Infinite Body	276
6.4.3	Steady State Thermal Stresses in a Long Circular Cylinder	284
	Problems	293
<b>7</b>	<b>Thermal Stresses in Spherical Bodies</b>	<b>295</b>
7.1	Thermal Stresses in Spherical Bodies	295
7.2	One-Dimensional Problems	295
7.2.1	A Hollow Sphere	297
7.2.2	A Solid Sphere	301
7.2.3	Infinite Bodies	304
7.3	Two-Dimensional Problems (Axisymmetric Problems)	309
7.4	Illustrative Examples of Axisymmetric Problems in Spherical Bodies	314
7.4.1	Fundamental Solution of Temperature Field	314
7.4.2	Components of Displacement and Stress in Terms of Displacement Functions $\varphi$ and $\psi$	316
	Problems	341
<b>8</b>	<b>Thermal Stresses in Plates</b>	<b>345</b>
8.1	Thermal Stress in a Plate Due to Uniform Thermal Load	345
8.2	Basic Equations for a Rectangular Plate	355
8.2.1	Fundamental Relations of Thermal Bending	355
8.2.2	Boundary Conditions of the Plate	360
8.3	Fundamental Solutions for Rectangular Plates	365
8.3.1	Simply Supported Rectangular Plate	365
8.3.2	A Rectangular Plate with Two Opposite Edges Simply Supported and the Other Two Edges Clamped	367
8.3.3	A Rectangular Plate with Built-in All Edges	371
8.4	Basic Equations for a Circular Plate	376
8.4.1	Fundamental Relations of Thermal Bending	376
8.4.2	Boundary Conditions for a Circular Plate	379
8.4.3	Axisymmetric Thermal Bending Problems	380
8.5	Fundamental Solutions for Circular Plates	381
8.5.1	Axisymmetric Problems	381
8.5.2	Non-axisymmetric Problems	387
	Problems	392
<b>9</b>	<b>Thermally Induced Instability</b>	<b>397</b>
9.1	Instability of Beam-Column	397

9.1.1	Introduction	397
9.1.2	Beam-Column Problems by Axially Imposed External Load	399
9.2	Instability of Plate	409
9.2.1	Basic Equations for a Rectangular Plate	409
9.2.2	Illustrative Examples for a Rectangular Plate	413
9.2.3	Basic Equations for a Circular Plate	419
9.2.4	Illustrative Examples for a Circular Plate	424
	Problems	429
<b>10</b>	<b>Thermodynamics of Thermoelasticity</b>	<b>431</b>
10.1	The Principle of Energy Conservation	431
10.2	The Second Law of Thermodynamics	434
10.2.1	Reversible and Irreversible Processes	434
10.2.2	Cycle of Carnot	435
10.2.3	Entropy	437
10.3	Thermodynamic Functions	439
10.4	Fundamental Differential Equations of Thermoelasticity	446
10.4.1	Heat Conduction Equation	446
10.4.2	Equation of Motion	447
10.4.3	Solution of Equation of Motion	449
10.5	The Variational Theorems of Thermoelasticity	451
10.6	Uniqueness Theorem	454
10.7	Reciprocal Theorem	457
10.7.1	Reciprocal Theorem	457
10.7.2	Practical Problem	463
	Problems	466
<b>A</b>	<b>Inverse Laplace Transform</b>	<b>469</b>
<b>B</b>	<b>Bessel Functions</b>	<b>473</b>
<b>C</b>	<b>Legendre Functions</b>	<b>479</b>
	<b>Books on Thermal Stresses</b>	<b>485</b>
	<b>Index</b>	<b>489</b>
