# Table of Contents

Mapping Problems with Finite-Domain Variables to Problems with Boolean Variables  
*Carlos Ansótegui, Felip Manyà* ................................. 1

A SAT-Based Decision Procedure for the Boolean Combination of Difference Constraints  
*Alessandro Armando, Claudio Castellini, Enrico Giunchiglia, Marco Maratea* ................................. 16

An Algebraic Approach to the Complexity of Generalized Conjunctive Queries  
*Michael Bauland, Philippe Chapdelaine, Nadia Creignou, Miki Hermann, Heribert Vollmer* ................................. 30

Incremental Compilation-to-SAT Procedures  
*Marco Benedetti, Sara Bernardini* ................................. 46

Resolve and Expand  
*Armin Biere* ................................. 59

Looking Algebraically at Tractable Quantified Boolean Formulas  
*Hubie Chen, Víctor Dalmau* ................................. 71

Derandomization of Schuler’s Algorithm for SAT  
*Evgeny Dantsin, Alexander Wolpert* ................................. 80

Polynomial Time SAT Decision, Hypergraph Transversals and the Hermitian Rank  
*Nicola Galesi, Oliver Kullmann* ................................. 89

QBF Reasoning on Real-World Instances  
*Enrico Giunchiglia, Massimo Narizzano, Armando Tacchella* ................................. 105

Automatic Extraction of Functional Dependencies  
*Éric Grégoire, Richard Ostrowski, Bertrand Mazure, Lakhdar Sais* ................................. 122

Analysis of Search Based Algorithms for Satisfiability of Propositional and Quantified Boolean Formulas Arising from Circuit State Space Diameter Problems

*Daijue Tang, Yinlei Yu, Darsh Ranjan, Sharad Malik* ................. 292

UBCSAT: An Implementation and Experimentation Environment for SLS Algorithms for SAT and MAX-SAT

*Dave A.D. Tompkins, Holger H. Hoos* ............................. 306

**2004 SAT Solver Competition and QBF Solver Evaluation (Invited Papers)**

Fifty-Five Solvers in Vancouver: The SAT 2004 Competition

*Daniel Le Berre, Laurent Simon* ................................. 321

March.eq: Implementing Additional Reasoning into an Efficient Look-Ahead SAT Solver

*Marijn Heule, Mark Dufour, Joris van Zwieten,
Hans van Maaren* .................................................. 345

Zchaff2004: An Efficient SAT Solver

*Yogesh S. Mahajan, Zhaohui Fu, Sharad Malik* ................. 360

The Second QBF Solvers Comparative Evaluation

*Daniel Le Berre, Massimo Narizzano, Laurent Simon,
Armando Tacchella* .................................................. 376
