# Table of Contents

CMMI RAMS Extension Based on CENELEC Railway Standard  
*Jose Antonio Fonseca, Jorge Rady de Almeida Júnior* .......................... 1

The Importance of Single-Source Engineering of Emergency and Process Shutdown Systems  
*Robert Martinez, Torgeir Enkerud* .................................................. 13

Combining Extended UML Models and Formal Methods to Analyze Real-Time Systems  
*Nawal Addouche, Christian Antoine, Jacky Montmain* ............................. 24

Defining and Decomposing Safety Policy for Systems of Systems  
*Martin Hall-May, Tim Kelly* ............................................................... 37

Generalising Event Trees Using Bayesian Networks with a Case Study of Train Derailment  
*George Bearfield, William Marsh* ...................................................... 52

Control and Data Flow Testing on Function Block Diagrams  
*Eunkyoung Jee, Junbeom Yoo, Sungdeok Cha* ........................................ 67

Comparing Software Measures with Fault Counts Derived from Unit-Testing of Safety-Critical Software  
*Wolfgang Herzner, Stephan Ramberger, Thomas Länger, Christian Reumann, Thomas Gruber, Christian Sejkora* ........................................ 81

Automatic Analysis of a Safety Critical Tele Control System  
*Edoardo Campagnano, Ester Ciancamerla, Michele Minichino, Enrico Tronci* ......................................................... 94

A Formal Model for Fault-Tolerance in Distributed Systems  
*Brahim Hamid, Mohamed Mosbah* ....................................................... 108

Model-Based Safety Analysis of Simulink Models Using SCADE Design Verifier  
*Anjali Joshi, Mats P.E. Heimdahl* ...................................................... 122

Using Safety Critical Artificial Neural Networks in Gas Turbine Aero-Engine Control  
*Zeshan Kurd, Tim P. Kelly* ............................................................... 136

# Table of Contents

1. **The TACO Approach for Traceability and Communication of Requirements**
   *Terje Sivertsen, Rune Fredriksen, Atoosa P-J Thunem, Jan-Erik Holmberg, Janne Valkonen, Olli Ventã, Jan-Ove Andersson* ............................................. 317

2. **An IEC 62061 Compliant Safety System Design Method for Machinery**
   *Bengt Ljungquist, Thomas Thelin* .................................................. 330

   *Tom Gilb* ...................................................................................... 344

4. **The Application of an Object-Oriented Method in Information System Security Evaluation**
   *Qiang Yan, Hua-ying Shu* ............................................................ 357

5. **Towards a Cyber Security Reporting System – A Quality Improvement Process**
   *Jose J. Gonzalez* ........................................................................ 368

6. **Security Research from a Multi-disciplinary and Multi-sectoral Perspective**
   *Atoosa P-J Thunem* ..................................................................... 381

7. **Problem Frames and Architectures for Security Problems**
   *Denis Hatebur, Maritta Heisel* ...................................................... 390

8. **Author Index** ............................................................................. 405
