DENOTATIONAL SEMANTICS
A Methodology for Language Development

David A. Schmidt
Kansas State University
Contents

Preface xi

INTRODUCTION 1
Methods for Semantics Specification 3
Suggested Readings 4

Chapter 1
SYNTAX 6
1.1 Abstract Syntax Definitions 10
1.2 Mathematical and Structural Induction 14
Suggested Readings 17
Exercises 17

Chapter 2
SETS, FUNCTIONS, AND DOMAINS 20
2.1 Sets 20
  2.1.1 Constructions on Sets 22
2.2 Functions 23
  2.2.1 Representing Functions as Sets 25
  2.2.2 Representing Functions as Equations 27
Chapter 6
DOMAIN THEORY II: RECURSIVELY DEFINED FUNCTIONS

6.1 Some Recursively Defined Functions 104
6.2 Partial Orderings 108
6.3 Continuous Functions 112
6.4 Least Fixed Points 113
6.5 Domains are Cpos 114
6.6 Examples 120
   6.6.1 Factorial Function 120
   6.6.2 Copyout Function 121
   6.6.3 Double Recursion 122
   6.6.4 Simultaneous Definitions 122
   6.6.5 The While-Loop 123
   6.6.6 Soundness of Hoare's Logic 126
6.7 Reasoning about Least Fixed Points 128
Suggested Readings 131
Exercises 131

Chapter 7
LANGUAGES WITH CONTEXTS

7.1 A Block-Structured Language 139
   7.1.1 Stack-Managed Storage 146
   7.1.2 The Meanings of Identifiers 148
7.2 An Applicative Language 150
   7.2.1 Scoping Rules 152
   7.2.2 Self-Application 155
   7.2.3 Recursive Definitions 157
7.3 Compound Data Structures 161
Suggested Readings 167
Exercises 167

Chapter 8
ABSTRACTION, CORRESPONDENCE, AND QUALIFICATION

8.1 Abstraction 174
   8.1.1 Recursive Bindings 178
8.2 Parameterization 179
   8.2.1 Polymorphism and Typing 181
8.3 Correspondence 185
8.4 Qualification 186
