Applications of Fuzzy Sets Theory

7th International Workshop on Fuzzy Logic and Applications, WILF 2007
Camogli, Italy, July 7-10, 2007
Proceedings

Springer
Table of Contents

Advances in Fuzzy Set Theory

From Fuzzy Beliefs to Goals ........................................ 1
    Célia da Costa Pereira and Andrea G.B. Tettamanzi

Information Entropy and Co–entropy of Crisp and Fuzzy
Granulations ....................................................... 9
    Daniela Bianucci, Gianpiero Cattaneo, and Davide Ciucci

Possibilistic Linear Programming in Blending and Transportation
Planning Problem .................................................. 20
    Bilge Bilgen

Measuring the Interpretive Cost in Fuzzy Logic Computations .... 28
    Pascual Julián, Ginés Moreno, and Jaime Penabad

A Fixed-Point Theorem for Multi-valued Functions with an Application
to Multilattice-Based Logic Programming .......................... 37
    Jesús Medina, Manuel Ojeda-Aciego, and Jorge Ruiz-Calviño

Contextualized Possibilistic Networks with Temporal Framework for
Knowledge Base Reliability Improvement .......................... 45
    Marco Grasso, Michèlè Lavagna, and Guido Sangiovanni

Reconstruction of the Matrix of Causal Dependencies for the Fuzzy
Inductive Reasoning Method ...................................... 53
    Guido Sangiovanni and Michèlè Lavagna

Derivative Information from Fuzzy Models .......................... 61
    Paulo Salgado and Fernando Gouveia

The Genetic Development of Uninorm-Based Neurons ................ 69
    Angelo Ciaramella, Witold Pedrycz, and Roberto Tagliaferri

Using Visualization Tools to Guide Consensus in Group Decision
Making ............................................................. 77
    Sergio Alonso, Enrique Herrera-Viedma, Francisco Javier Cabrerizo,
    Carlos Porcel, and A.G. López-Herrera

Reconstruction Methods for Incomplete Fuzzy Preference Relations:
A Numerical Comparison .......................................... 86
    Matteo Brunelli, Michele Fedrizzi, and Silvio Giove
Fuzzy Information Access and Retrieval

Web User Profiling Using Fuzzy Clustering ............................................. 94
  Giovanna Castellano, Fabrizio Mesto, Michele Minunno, and
  Maria Alessandra Torsello

Exploring the Application of Fuzzy Logic and Data Fusion Mechanisms
in QAS ................................................................. 102
  Daniel Ortiz-Arroyo and Hans Ulrich Christensen

Fuzzy Indices of Document Reliability .................................................. 110
  Célia da Costa Pereira and Gabriella Pasi

Fuzzy Ontology, Fuzzy Description Logics and Fuzzy-OWL ..................... 118
  Silvia Calegari and Davide Ciucci

Fuzzy Machine Learning

An Improved Weight Decision Rule Using SNNR and Fuzzy Value for
Multi-modal HCI ............................................................. 127
  Jung-Hyun Kim and Kwang-Seok Hong

DWT-Based Audio Watermarking Using Support Vector Regression
and Subsampling ............................................................... 136
  Xiaojuan Xu, Hong Peng, and Chengyuan He

Improving the Classification Ability of DC* Algorithm ......................... 145
  Corrado Mencar, Arianna Consiglio, Giovanna Castellano, and
  Anna Maria Fanelli

Combining One Class Fuzzy KNN's .................................................... 152
  Vito Di Gesù and Giosuè Lo Bosco

Missing Clusters Indicate Poor Estimates or Guesses of a Proper Fuzzy
Exponent ................................................................. 161
  Ulrich Möller

An Analysis of the Rule Weights and Fuzzy Reasoning Methods for
Linguistic Rule Based Classification Systems Applied to Problems with
Highly Imbalanced Data Sets .................................................. 170
  Alberto Fernández, Salvador García, Francisco Herrera, and
  María José del Jesús

Fuzzy Clustering for the Identification of Hinging Hyperplanes Based
Regression Trees ............................................................ 179
  Tamas Kenesei, Balazs Feil, and Janos Abonyi
Evaluating Membership Functions for Fuzzy Discrete SVM

Carlotta Orsenigo and Carlo Vercellis

187

Improvement of Jarvis-Patrick Clustering Based on Fuzzy Similarity

Agnes Vathy-Fogarassy, Attila Kiss, and Janos Abonyi

195

Fuzzy Rules Generation Method for Pattern Recognition Problems

Dmitry Kropotov and Dmitry Vetrov

203

Outliers Detection in Selected Fuzzy Regression Models

Barbara Gladysz and Dorota Kuchta

211

Possibilistic Clustering in Feature Space

Maurizio Filippone, Francesco Masulli, and Stefano Rovetta

219

Fuzzy Architectures and Systems

OpenAdap.net: Evolvable Information Processing Environment

Alessandro E.P. Villa and Javier Iglesias

227

Binary Neuro-Fuzzy Classifiers Trained by Nonlinear Quantum Circuits

Massimo Panella and Giuseppe Martinelli

237

Digital Hardware Implementation of High Dimensional Fuzzy Systems

Pablo Echevarria, M. Victoria Martinez, Javier Echanobe, Inés del Campo, and Jose M. Tarela

245

Optimization of Hybrid Electric Cars by Neuro-Fuzzy Networks

Fabio Massimo Frattale Mascioli, Antonello Rizzi, Massimo Panella, and Claudia Bettiol

253

Fuzzy k-NN Lung Cancer Identification by an Electronic Nose

Rossella Blatt, Andrea Bonarini, Elisa Calabró, Matteo Della Torre, Matteo Matteucci, and Ugo Pastorino

261

Efficient Implementation of SVM Training on Embedded Electronic Systems

Paolo Gastaldo, Giovanni Parodi, Sergio Decherchi, and Rodolfo Zunino

269

A Possible Approach to Cope with Uncertainties in Space Applications

Michèle Lavagna and Guido Sangiovanni

277
# Table of Contents

## Special Session on Intuitionistic Fuzzy Sets: Recent Advances

Fuzzy Measures: Collectors of Entropies ............................................. 285  
*Doretta Vivona and Maria Divari*

Some Problems with Entropy Measures for the Atanassov Intuitionistic Fuzzy Sets .................................................... 291  
*Eulalia Szmidt and Janusz Kacprzyk*

Twofold Extensions of Fuzzy Datalog ................................................. 298  
*Ágnes Achs*

Combs Method Used in an Intuitionistic Fuzzy Logic Application ............ 306  
*Jon E. Ervin and Sema E. Alptekin*

Intuitionistic Fuzzy Spatial Relationships in Mobile GIS Environment ................................................................. 313  
*Mohammad Reza Malek, Farid Karimipour, and Saeed Nadi*

A Two-Dimensional Entropic Approach to Intuitionistic Fuzzy Contrast Enhancement ................................................................. 321  
*Ioannis K. Vlachos and George D. Sergiadis*

Intuitionistic Fuzzy Histogram Hyperbolization for Color Images ............ 328  
*Ioannis K. Vlachos and George D. Sergiadis*

## Special Session on Soft Computing in Image Processing

Computer Vision and Pattern Recognition in Homeland Security Applications ................................................................. 335  
*Giovanni B. Garibotto*

A Genetic Algorithm Based on Eigen Fuzzy Sets for Image Reconstruction ................................................................. 342  
*Ferdinando Di Martino and Salvatore Sessa*

Fuzzy Metrics Application in Video Spatial Deinterlacing .................... 349  
*Julio Riquelme, Samuel Morillas, Guillermo Peris-Fajarnés, and Dolores Castro*

Fuzzy Directional-Distance Vector Filter .......................................... 355  
*Samuel Morillas, Valentin Gregori, Julio Riquelme, Beatriz Defez, and Guillermo Peris-Fajarnés*
Color Texture Segmentation with Local Fuzzy Patterns and Spatially Constrained Fuzzy C-Means .................................................. 362
Przemyslaw Gorecki and Laura Caponetti

A Flexible System for the Retrieval of Shapes in Binary Images ............. 370
Gloria Bordogna, Luca Ghilardi, Simone Milesi, and Marco Pagani

Fuzzy C-Means Segmentation on Brain MR Slices Corrupted by RF-Inhomogeneity .................................................. 378
Edoardo Ardizzone, Roberto Pirrone, and Orazio Gambino

Dilation and Erosion of Spatial Bipolar Fuzzy Sets ............................... 385
Isabelle Bloch

About the Embedding of Color Uncertainty in CBIR Systems ................. 394
Fabio Di Donna, Lucia Maddalena, and Alfredo Petrosino

Evolutionary Cellular Automata Based-Approach for Edge Detection .... ..... 404
Siham Slatnia, Mohamed Batouche, and Kamal E. Melkemi

Special Session Third International Workshop on Cross-Language Information Processing (CLIP 2007)

The Multidisciplinary Facets of Research on Humour .......................... 412
Rada Mihalcea

Multi-attribute Text Classification Using the Fuzzy Borda Method and Semantic Grades .................................................. 422
Eugene Levner, David Alcaide, and Joaquin Sicilia

Approximate String Matching Techniques for Effective CLIR Among Indian Languages .................................................. 430
Ranbeer Makin, Nikita Pandey, Prasad Pingali, and Vasudeva Varma

Using Translation Heuristics to Improve a Multimodal and Multilingual Information Retrieval System .................................. 438
Miguel Ángel García-Cumbreras, Maria Teresa Martín-Valdivia, Luis Alfonso Ureña-López, Manuel Carlos Díaz-Galiano, and Arturo Montejo-Ráez

Ontology-Supported Text Classification Based on Cross-Lingual Word Sense Disambiguation .................................................. 447
Dan Tufiş and Svetla Koeva

Opinion Analysis Across Languages: An Overview of and Observations from the NTCIR6 Opinion Analysis Pilot Task .................... 456
David Kirk Evans, Lun-Wei Ku, Yohei Seki, Hsin-Hsi Chen, and Noriko Kando
Some Experiments in Humour Recognition Using the Italian Wikiquote Collection ........................................ 464
   Davide Buscaldi and Paolo Rosso

Recognizing Humor Without Recognizing Meaning ....................... 469
   Jonas Sjöbergh and Kenji Araki

Computational Humour: Utilizing Cross-Reference Ambiguity for Conversational Jokes ......................... 477
   Hans Wim Tinholt and Anton Nijholt

Special Session Fourth International Meeting on Computational Intelligence Methods for Bioinformatics Biostatistics (CIBB 2007)

Dataset Complexity and Gene Expression Based Cancer Classification .................................................. 484
   Oleg Okun and Helen Priisalu

A Novel Hybrid GMM/SVM Architecture for Protein Secondary Structure Prediction .............................. 491
   Emad Bahrami Samani, M. Mehdi Homayounpour, and Hong Gu

A Graph Theoretic Approach to Protein Structure Selection .......... 497
   Marco Vassura, Luciano Margara, Piero Fariselli, and Rita Casadio

Time-Series Alignment by Non-negative Multiple Generalized Canonical Correlation Analysis .................. 505
   Bernd Fischer, Volker Roth, and Joachim M. Buhmann

Generative Kernels for Gene Function Prediction Through Probabilistic Tree Models of Evolution ................ 512
   Luca Nicotra, Alessio Micheli, and Antonina Starita

Liver Segmentation from CT Scans: A Survey ........................ 520
   Paola Campadelli and Elena Casiraghi

Clustering Microarray Data with Space Filling Curves ................ 529
   Dimitrios Vogiatzis and Nicolas Tsapatsoulis

Fuzzy Ensemble Clustering for DNA Microarray Data Analysis ...... 537
   Roberto Avogadri and Giorgio Valentini

Signal Processing in Comparative Genomics .......................... 544
   Matteo Ré and Giulio Pavesi

An Interactive Tool for the Management and Visualization of Mass-Spectrometry Proteomics Data ............................................. 635
    Mario Cannataro, Giovanni Cuda, Marco Gaspari, and Pierangelo Veltri

Smart Sequence Similarity Search(S4) System .................................. 643
    Zhuo Chen, Arturo Concepcion, Anthony Metcalf,
    Arokiya Joseph, and Laurence Bohannan

Prediction of over Represented Transcription Factor Binding Sites in
Co-regulated Genes Using Whole Genome Matching Statistics ............. 651
    Giulio Pavesi and Federico Zambelli

Unsupervised Haplotype Reconstruction and LD Blocks Discovery in a
Hidden Markov Framework .......................................................... 659
    Alessandro Perina, Marco Cristani, Giovanni Malerba,
    Luciano Xumerle, Vittorio Murino, and Pier Franco Pignatti

Multi-class Protein Fold Recognition Through a Symbolic-Statistical
Framework ................................................................................. 666
    Marenglen Biba, Floriana Esposito, Stefano Ferilli,
    Teresa M.A. Basile, and Nicola Di Mauro

Assessment of Common Regions and Specific Footprints of DNA
Copy Number Aberrations Across Multiple Affymetrix SNP Mapping
Arrays ....................................................................................... 674
    Roberta Spinelli, Ingrid Cifola, Stefano Ferrero, Luca Beltrame,
    Paolo Mocarelli, and Cristina Battaglia

Locally Adaptive Statistical Procedures for the Integrative Analysis on
Genomic and Transcriptional Data .................................................... 682
    Mattia Zampieri, Ingrid Cifola, Dario Basso, Roberta Spinelli,
    Luca Beltrame, Clelia Peano, Cristina Battaglia, and Silvio Bicciato

Author Index ............................................................................. 691
