# Contents<sup>†</sup>

<b>Preface</b>	<b>vii</b>
<b>Chapter 1 Homology Groups of a Simplicial Complex</b>	<b>1</b>
§1 Simplicies	2
§2 Simplicial Complexes and Simplicial Maps	7
§3 Abstract Simplicial Complexes	15
§4 Review of Abelian Groups	20
§5 Homology Groups	26
§6 Homology Groups of Surfaces	33
§7 Zero-dimensional Homology	41
§8 The Homology of a Cone	43
§9 Relative Homology	47
*§10 Homology with Arbitrary Coefficients	51
*§11 The Computability of Homology Groups	53
§12 Homomorphisms Induced by Simplicial Maps	62
§13 Chain Complexes and Acyclic Carriers	71
<b>Chapter 2 Topological Invariance of the Homology Groups</b>	<b>79</b>
§14 Simplicial Approximations	80
§15 Barycentric Subdivision	83

<sup>†</sup>The sections marked with an asterisk can be omitted or postponed until needed. Chapter 2 can be omitted.

- §16 The Simplicial Approximation Theorem 89
- §17 The Algebra of Subdivision 95
- §18 Topological Invariance of the Homology Groups 100
- §19 Homomorphisms Induced by Homotopic Maps 103
- §20 Review of Quotient Spaces 111
- \*§21 Application: Maps of Spheres 116
- \*§22 Application: The Lefschetz Fixed-point Theorem 121

### **Chapter 3 Relative Homology and the Eilenberg-Steenrod Axioms**

**129**

- §23 The Exact Homology Sequence 129
- §24 The Zig-zag Lemma 136
- §25 Mayer-Vietoris Sequences 142
- §26 The Eilenberg-Steenrod Axioms 145
- §27 The Axioms for Simplicial Theory 149
- \*§28 Categories and Functors 154

### **Chapter 4 Singular Homology Theory**

**161**

- §29 The Singular Homology Groups 162
- §30 The Axioms for Singular Theory 168
- §31 Excision in Singular Homology 175
- \*§32 Acyclic Models 183
- §33 Mayer-Vietoris Sequences 186
- §34 The Isomorphism Between Simplicial and Singular Homology 190
- \*§35 Application: Local Homology Groups and Manifolds 196
- \*§36 Application: The Jordan Curve Theorem 202
- §37 More on Quotient Spaces 209
- §38 CW Complexes 214
- §39 The Homology of CW Complexes 222
- \*§40 Application: Projective Spaces and Lens Spaces 231

### **Chapter 5 Cohomology**

**245**

- §41 The Hom Functor 245
- §42 Simplicial Cohomology Groups 251
- §43 Relative Cohomology 257
- §44 Cohomology Theory 262
- §45 The Cohomology of Free Chain Complexes 270

*§46	Chain Equivalences in Free Chain Complexes	279
§47	The Cohomology of CW Complexes	281
§48	Cup Products	285
§49	Cohomology Rings of Surfaces	292
<b>Chapter 6</b>	<b>Homology with Coefficients</b>	<b>299</b>
§50	Tensor Products	299
§51	Homology with Arbitrary Coefficients	307
<b>Chapter 7</b>	<b>Homological Algebra</b>	<b>313</b>
§52	The Ext Functor	314
§53	The Universal Coefficient Theorem for Cohomology	320
§54	Torsion Products	327
§55	The Universal Coefficient Theorem for Homology	332
*§56	Other Universal Coefficient Theorems	334
§57	Tensor Products of Chain Complexes	338
§58	The Künneth Theorem	341
§59	The Eilenberg-Zilber Theorem	350
*§60	The Künneth Theorem for Cohomology	353
*§61	Application: The Cohomology Ring of a Product Space	360
<b>Chapter 8</b>	<b>Duality in Manifolds</b>	<b>367</b>
§62	The Join of Two Complexes	368
§63	Homology Manifolds	374
§64	The Dual Block Complex	377
§65	Poincaré Duality	382
§66	Cap Products	388
§67	A Second Proof of Poincaré Duality	394
*§68	Application: Cohomology Rings of Manifolds	399
*§69	Application: Homotopy Classification of Lens Spaces	408
§70	Lefschetz Duality	414
§71	Alexander Duality	424
§72	"Natural" Versions of Lefschetz and Alexander Duality	426
§73	Čech Cohomology	433
§74	Alexander-Pontryagin Duality	445
<b>Bibliography</b>		<b>447</b>
<b>Index</b>		<b>449</b>
